

**Automation
Tool**

Profindis Deployment Portal
Automated Rollouts and Site Networking

Profindis Deployment Portal

Overview

Why a Tool?

Network Migrations:

- Time-consuming and expensive processes
- Many skilled workers are needed on-site for preconfigurations
- Prone to human errors

Many SDN products fail:

- due to the flexible application and scalability.

Why Profindis?

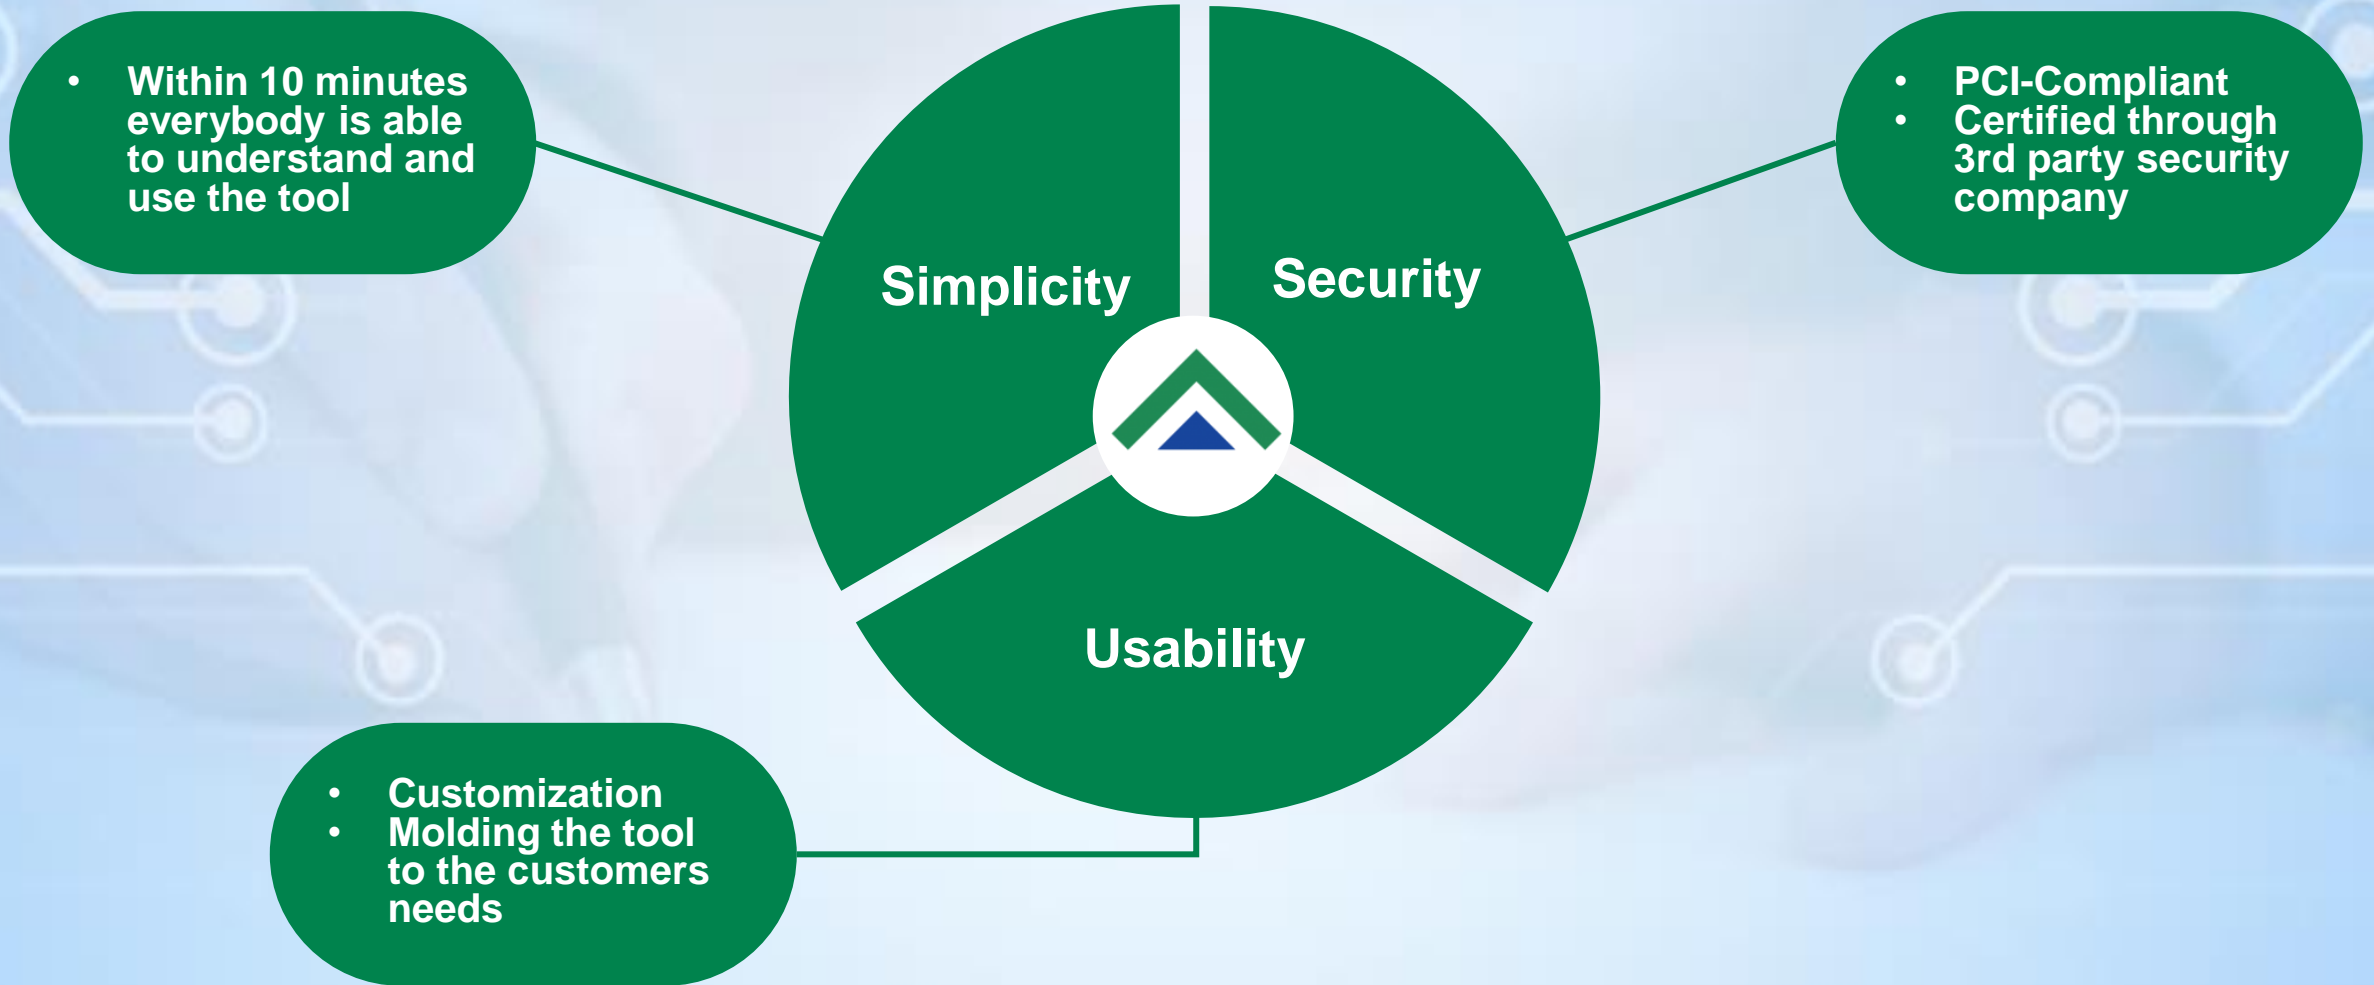

- Experts in **site networking, automation** and **security**
- Over **15 years of experience** in IT-Networking
- Over **25.000 successfully migrated sites** in the last five years
- Working together with companies and organizations from **100 to more than 10.000 sites**
- Intelligent merging of **network engineering** and **software development**

Profindis Deployment Portal

Overview

	Traditional Tools	Profindis Deployment Portal
Automatic configuration of new devices	✗	✓
Easy-to-use interface (enables even low skilled technicians to perform a rollout)	✗	✓
Perform several rollouts at the same time	✗	✓
Single point of management	✗	✓
Costs	more sites = more expensive	more sites = less expensive
Customization to individual needs	✗	✓
